

Addition		Concrete	Pictorial	Abstract	Mastery	Greater Depth											
EYFS	Children count reliably with numbers from 1 to 20, place them in order and say which number is one more or one less than a given number.			1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20		A number line has been cut up. Can you find the missing numbers? <table border="1" style="margin-left: auto; margin-right: auto;"> <tr><td> </td><td>5</td><td> </td></tr> <tr><td> </td><td> </td><td>8</td></tr> <tr><td> </td><td>3</td><td> </td><td>5</td><td> </td></tr> </table>		5				8		3		5	
	5																
		8															
	3		5														
	Using quantities and objects, they add and subtract two single-digit numbers and count on or back to find the answer.			$6+4=$		Here are two ten frames.  Combine the numbers to find out how many there are altogether. Write a number sentence to show your working.											
Year One	Read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs.			Write a number sentence to describe the ten frame. 	Robert has 5 more cherries than John. John has 11 cherries. How many does Robert have? Write a number sentence you would use to solve the problem. <table style="margin-left: auto; margin-right: auto;"> <tr> <td><input type="text"/></td> <td><input type="text"/></td> <td><input type="text"/></td> <td>=</td> <td><input type="text"/></td> </tr> </table>	<input type="text"/>	<input type="text"/>	<input type="text"/>	=	<input type="text"/>	If you know one fact, what other facts do you know? Complete: 						
<input type="text"/>	<input type="text"/>	<input type="text"/>	=	<input type="text"/>													

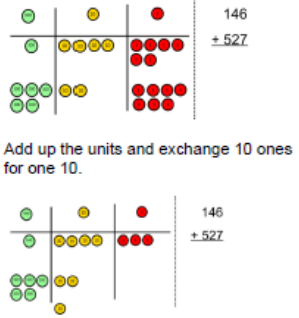

<p>Represent and use number bonds and related subtraction facts within 20.</p>	 <p>Use cubes to add two numbers together as a group or in a bar.</p>	 <p>Use pictures to add two numbers together as a group or in a bar.</p>	<p>$4 + 3 = 7$</p> <p>$10 = 6 + 4$</p>  <p>Use the part-part whole diagram as shown above to move into the abstract.</p>	<p>Use the pattern to complete the number sentences.</p>  <p>Children should be able to recall all number bonds to and within 10. Exposing the structure of the mathematics supports this process. They should then apply this to number bonds to 20, so if $5 + 3 = 8$, $15 + 3 = 18$</p>	<p>Show children a price list with items costing up to 20p. I have 20p to spend. If I spend 20p exactly, which two items could I buy? And another two, and another two.</p> <p>If I bought one of the items how much change would I have? And another one, and another one.</p>
<p>Add and subtract one-digit and two-digit numbers to 20, including zero.</p>	 <p>Start with the larger number on the bead string and then count on to the smaller number 1 by 1 to find the answer.</p>	 <p>Start at the larger number on the number line and count on in ones or in one jump to find the answer.</p>	<p>$5 + 12 = 17$</p> <p>Place the larger number in your head and count on the smaller number to find your answer.</p>	<p>Complete:</p> <p>$3 + \square = 10$</p> <p>$\square + 5 = 10$</p> <p>$\square + \square = 10$</p> <p>$13 + \square = 20$</p> <p>$15 + \square = 20$</p> <p>$16 + \square = 20$</p>	<p>Write a pair of numbers in the boxes to add to 12.</p> <p>$\square + \square = 12$</p> <p>And another pair, and another, and another. Can you find all possibilities? Convince me!</p>
<p>Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such</p>	<p>Jim has 7 cubes. Amy has 3 cubes. How many cubes do they have altogether?</p> 	<p>Complete the missing number.</p> 	<p>James has two dice. He rolls them and scores 5 altogether. Which two numbers could he have rolled?</p>	<p>Captain Conjecture says, 'If you add 0 to a number, the number stays the same.' Do you agree? Explain your reasoning.</p>	<p>Write the numbers 1 to 5 in the squares so that each row and column adds up to the same number, called the 'magic number'. What is the 'magic number'?</p> 

	as $7 = -9$.																													
Year 2	Solve problems with addition and subtraction using concrete objects and pictorial representations, including those involving numbers, quantities and measures.	<p>Jim has 7 cubes. Amy has 3 cubes. How many cubes do they have altogether?</p> 	<p>Complete the missing number.</p> 	<p>There are 5 people upstairs on the bus, there are 4 people downstairs. How many altogether? Write a number sentence to show this.</p>	<p>Dan needs 80 g of sugar for his recipe. There are 45 g left in the bag. How much more does he need to get?</p> <p>The temperature was 26 degrees in the morning and 11 degrees colder in the evening. What was the temperature in the evening?</p> <p>A tub contains 24 coins. Saj takes 5 coins. Joss takes 10 coins. How many coins are left in the tub?</p>	<p>Together Jack and Sam have £12. Jack has £2 more than Sam. How much money does Sam have?</p>																								
	Solve problems with addition and subtraction applying their increasing knowledge of mental and written methods.	<p>Use cubes to help you solve the problem.</p> 	<p>Can I subtract 2 digit numbers?</p> 	<p>Can I add?</p> 	<p>Captain Conjecture says, 'An odd number + an odd number = an even number'. Is this sometimes, always or never true? Explain your reasoning.</p>	<p>Captain Conjecture says, 'An odd number + an odd number = an even number'. Is this sometimes, always or never true? Explain your reasoning.</p>																								
	Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100.	 <p>Use cubes to add two numbers together as a group or in a bar.</p>	 <p>Use pictures to add two numbers together as a group or in a bar.</p>	<p>$4 + 3 = 7$</p> <p>$10 = 6 + 4$</p>  <p>Use the part-part whole diagram as shown above to move into the abstract.</p>	<p>What do you notice about each set of calculations? What's the same and what's different about the three sets of calculations?</p> <table border="1" data-bbox="1473 1182 1787 1385"> <tr> <td>10 - 9 =</td> <td>20 - 19 =</td> <td>100 - 90 =</td> </tr> <tr> <td>10 - 8 =</td> <td>20 - 18 =</td> <td>100 - 80 =</td> </tr> <tr> <td>10 - 7 =</td> <td>20 - 17 =</td> <td>100 - 70 =</td> </tr> <tr> <td>10 - 6 =</td> <td>20 - 16 =</td> <td>100 - 60 =</td> </tr> <tr> <td>10 - 5 =</td> <td>20 - 15 =</td> <td>100 - 50 =</td> </tr> <tr> <td>10 - 4 =</td> <td>20 - 14 =</td> <td>100 - 40 =</td> </tr> <tr> <td>10 - 3 =</td> <td>20 - 13 =</td> <td>100 - 30 =</td> </tr> <tr> <td>10 - 2 =</td> <td>20 - 12 =</td> <td>100 - 20 =</td> </tr> </table>	10 - 9 =	20 - 19 =	100 - 90 =	10 - 8 =	20 - 18 =	100 - 80 =	10 - 7 =	20 - 17 =	100 - 70 =	10 - 6 =	20 - 16 =	100 - 60 =	10 - 5 =	20 - 15 =	100 - 50 =	10 - 4 =	20 - 14 =	100 - 40 =	10 - 3 =	20 - 13 =	100 - 30 =	10 - 2 =	20 - 12 =	100 - 20 =	<p>Complete the calculations.</p> <p>$30 + 40 + \square = 100$</p> <p>$40 + \square + 20 = 100$</p> <p>$36 + 44 + \square = 100$</p> <p>$36 + 54 + \square = 100$</p> <p>$47 + \square + 20 = 100$</p> <p>$47 + \square + 30 = 100$</p>

<p>Year 3</p>	<p>Add and subtract numbers mentally,</p> <ul style="list-style-type: none"> Including a three-digit number and ones. Including a three-digit number and tens. Including a three-digit number and hundreds. 		<p>Children can draw a pictorial representation of the columns and place value counters to further support their learning and understanding.</p>	<p>Start by partitioning the numbers before moving on.</p> $\begin{array}{r} 20 + 5 \\ 40 + 8 \\ 60 + 13 = 73 \end{array}$ $\begin{array}{r} 536 \\ + 85 \\ \hline 621 \\ 11 \end{array}$	<p>Complete these calculations. What do you notice?</p> $\begin{array}{lll} 3 + 7 = & 8 + 2 = & 6 + 4 = \\ 30 + 70 = & 80 + 20 = & 60 + 40 = \\ 33 + 7 = & 88 + 2 = & 66 + 4 = \\ 333 + 7 = & 888 + 2 = & 666 + 4 = \\ 300 + 700 = & 800 + 200 = & 600 + 400 = \end{array}$	<p>Throw a 1 to 6 dice and each time record the digit in one of the place holders. The aim is to get the sum as low as possible. Repeat to find different answers. Could you have done it in a different way? Compete against a friend and compare your answers.</p> <p><input type="text"/> <input type="text"/> <input type="text"/> + <input type="text"/> <input type="text"/> <input type="text"/> =</p>				
	<p>Estimate the answer to a calculation and use inverse operations to check answers.</p>		<p>Which of these has the wrong answer?</p> <table border="1" data-bbox="772 758 1093 901"> <tbody> <tr> <td>$740 - 300 = 440$</td> <td>$240 + 310 = 550$</td> </tr> <tr> <td>$199 + 199 = 399$</td> <td>$501 + 501 = 1002$</td> </tr> </tbody> </table>	$740 - 300 = 440$	$240 + 310 = 550$	$199 + 199 = 399$	$501 + 501 = 1002$	<p>Make an estimate: Which of the following number sentences have an answer between 50 and 60?</p> <p>274 - 219 533 - 476 132 - 71</p>	<p>Colin says. 'If I add two numbers together I can check my answer by using a subtraction of the same numbers afterwards. So to check 3 + 4, I can do 4 - 3.' Is he always right? Explain why.</p>	<p>Is it magic? Think of a number. Multiply it by 5. Double it. Add 2. Subtract 2. Halve it. Divide it by 5. Have you got back to your original number? Is this magic? Can you work out what has happened? Explain to a friend.</p>
$740 - 300 = 440$	$240 + 310 = 550$									
$199 + 199 = 399$	$501 + 501 = 1002$									
	<p>Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction.</p>	<p>Find and make the missing number.</p>	<p>Complete the part whole diagram.</p>		<p>Using coins, find three ways to make £1.</p>	<p>Sophie has five coins in her pocket. How much money might she have? What is the greatest amount she can have? What is the least amount she can have? If all the coins are different: What is the greatest amount she can have? What is the least amount she can have?</p>				

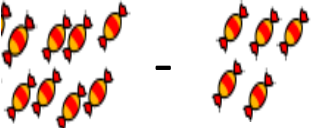

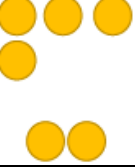

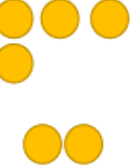

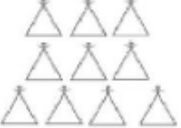

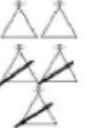

<p>Year 4</p>	<p>Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate.</p>	 <p>Add up the units and exchange 10 ones for one 10.</p>	<p>Children can draw a pictorial representation of the columns and place value counters to further support their learning and understanding.</p>	<p>Start by partitioning the numbers before moving on.</p> $\begin{array}{r} 20 + 5 \\ 40 + 8 \\ 60 + 13 = 73 \end{array}$ $\begin{array}{r} 536 \\ + 85 \\ \hline 621 \\ 11 \end{array}$	<p>Write down the four relationships you can see in the bar model.</p>  $\begin{array}{l} \square + \square = \square \\ \square + \square = \square \\ \square - \square = \square \\ \square - \square = \square \end{array}$	<p>Identify the missing numbers in these bar models. They are not drawn to scale.</p>  <p>Select your own numbers to make this bar model correct.</p> 
	<p>Estimate and use inverse operations to check answers to a calculation. Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.</p>			<p>Hazel fills in this bar model.</p>  <p>She makes the following calculations from it.</p> $\begin{array}{l} 2,821 - 2,178 = 757 \\ 2,821 - 757 = 2,178 \\ 2,178 + 757 = 2,821 \\ 757 + 2,178 = 2,821 \end{array}$ <p>Is she correct? Explain why.</p>	<p>With a friend, discuss before working each out which will be greater or smaller than the other. Why do you think this? What key facts did you use?</p> <p> <input type="radio"/> $3,567 - 567$ <input type="radio"/> $3,677 - 344$ <input type="radio"/> $4,738 + 36$ <input type="radio"/> $4,738 + 18 + 18$ <input type="radio"/> $2,139 - 85 + 27$ <input type="radio"/> $2,151 - 86 + 30$ </p>	

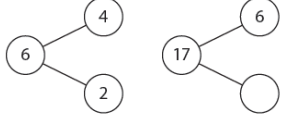

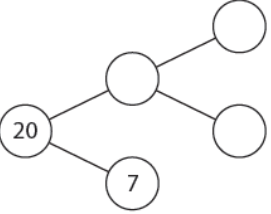

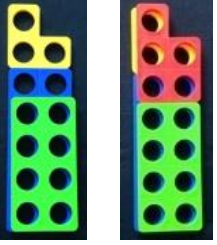

Year 5	Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)		Children can draw a pictorial representation of the columns and place value counters to further support their learning and understanding.	Start by partitioning the numbers before moving on. $\begin{array}{r} 20 + 5 \\ 40 + 8 \\ 60 + 13 = 73 \end{array}$ $\begin{array}{r} 536 \\ + 85 \\ \hline 621 \\ 11 \end{array}$	Set out and solve these calculations using a column method. $3254 + \square = 7999$ $2431 = \square - 3456$ $6373 - \square = 3581$ $6719 = \square - 4562$	True or False? $3999 - 2999 = 4000 - 3000$ $3999 - 2999 = 3000 - 2000$ $2741 - 1263 = 2742 - 1264$ $2741 + 1263 = 2742 + 1264$ $2741 - 1263 = 2731 - 1253$ $2741 - 1263 = 2742 - 1252$ Explain your reasoning.
	Add and subtract numbers mentally with increasingly large numbers.			Work out this missing numbers: $\square - 92 = 145$ $740 + \square = 1,039$ $\square = 580 - 401$	If 2,541 is the answer, what's the question? - Can you create three addition calculations? - Can you create three subtraction calculations? - Did you use a strategy?	Use this number sentence to write down three more pairs of decimal numbers that sum to 3: $1.6 + 1.4 = 3$
	Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.			A car showroom reduces the price of a car from £18,750 to £14,999. By how much was the price of the car reduced? Circle the most sensible answer \square £3,249 \square £4,001 \square £3,751	Captain Conjecture says, 'When working with whole numbers, if you add two 2-digit numbers together the answer cannot be a 4-digit number.' Do you agree? Explain your reasoning.	Captain Conjecture says, 'If you keep subtracting 3 from 397 you will eventually reach 0.' Do you agree? Explain your reasoning.
	Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.		$122 + \square + 57 = 327$	Beth and Mabel share £410 between them. Beth received £100 more than Mabel. How much did Mabel receive?	The table shows the cost of train tickets from different cities. What is the total cost for a return journey to York for one adult and two children? How much more does it cost for two adults to make a single journey to Hull than to Leeds?	Sam and Tom have £67.80 between them. If Sam has £6.20 more than Tom, how much does Tom have?

		York	Hull	Leeds
Adult	Single	£13.50	£16.60	£11.00
	Return	£24.50	£30.00	£20.00
Child	Single	£9.75	£11.00	£8.00
	Return	£15.00	£18.50	£13.50

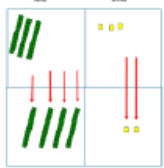

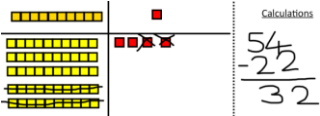

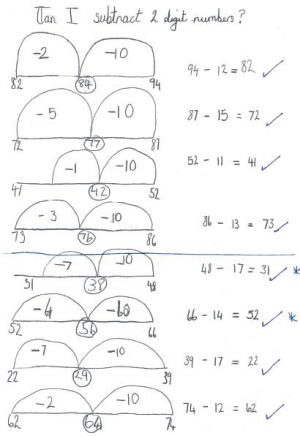

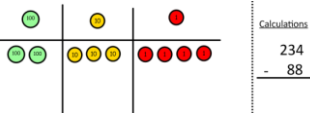

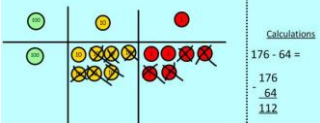

Year 6	Perform mental calculations, including with mixed operations and large numbers.			<p>The following problem was given to the class.</p> $\square + 50 = \square - 25$ <p>Shellie says</p> <div style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center; width: fit-content; margin: 10px auto;"> <p>Whatever digits we put in those boxes they will always be positive numbers</p> </div> <p>Do you agree? Explain your reason.</p>	<p>Calculate $36 \cdot 2 + 19 \cdot 8$ with a formal written column method with a mental method, explaining your reasoning.</p>	<p>Jasmine and Kamal have been asked to work out $5748 + 893$ and $5748 - 893$. Jasmine says, '893 is 7 less than 900, and 900 is 100 less than 1000, so I can work out the addition by adding on 1000 and then taking away 100 and then taking away 7.'</p> <p>What answer does Jasmine get, and is she correct? Kamal says, '893 is 7 less than 900, and 900 is 100 less than 1000, so I can work out the subtraction by taking away 1000 and then taking away 100 and then taking away 7.'</p> <p>What answer does Kamal get, and is he correct? If you disagree with either Jasmine or Kamal, can you correct their reasoning?</p>
	Use their knowledge of the order of operations to carry out calculations involving the four operations.				<p>Compare $31 + 9 \times 7$ and $(31 + 9) \times 7$. What's the same? What's different?</p>	<p>Write different number sentences using the digits 2, 3, 5 and 8 before the equals sign, using:</p> <ul style="list-style-type: none"> • one operation • two operations but no brackets • two operations and brackets. <p>Can you write a number sentence using the digits 2, 3, 5 and 8 before the equals sign, which has the same answer as another number sentence using the digits 2, 3, 5 and 8 but which is a different sentence?</p>

	<p>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.</p>				<p>Two numbers have a difference of 2:38 . The smaller number is 3:12 . What is the bigger number? Two numbers have a difference of 2:3 . They are both less than 10. What could the numbers be?</p>	<p>Two numbers have a difference of 2:38 . What could the numbers be if:</p> <ul style="list-style-type: none"> • the two numbers add up to 6? • one of the numbers is three times as big as the other number? <p>Two numbers have a difference of 2:3 . To the nearest 10, they are both 10. What could the numbers be?</p>

Subtraction						
		Concrete	Pictorial	Abstract	Mastery	Greater Depth
EYFS	Children count reliably with numbers from 1 to 20, place them in order and say which number is one more or one less than a given number.			1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20		A number line has been cut up. Can you find the missing numbers? <div style="display: flex; justify-content: space-around; border: 1px solid black; width: 100px; height: 20px; margin-bottom: 5px;"></div> <div style="display: flex; justify-content: space-around; border: 1px solid black; width: 100px; height: 20px; margin-bottom: 5px;"></div> <div style="display: flex; justify-content: space-around; border: 1px solid black; width: 100px; height: 20px;"></div>
	Using quantities and objects, they add and subtract two single-digit numbers and count on or back to find the answer.			$7-2=$	 <i>J counted out 10 raisins. Then counted down as he ate them 10, 9, 8, 7, 6, 5, 4, 3, 2, 1.</i>	Use physical objects, counters, cubes etc. to show how objects can be taken away. <div style="display: flex; align-items: center; margin-top: 20px;"> <div style="margin-right: 10px;">  </div> <div style="margin-right: 10px;"> $6-2=4$ </div> </div>
Year One	Read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs.	Use physical objects, counters, cubes etc. to show how objects can be taken away. <div style="display: flex; align-items: center; margin-top: 10px;"> <div style="margin-right: 10px;">  </div> <div> $6-2=4$ </div> </div>	Cross out drawn objects to show what has been taken away. <div style="display: flex; align-items: center; margin-top: 10px;"> <div style="margin-right: 20px;">  </div> <div>  </div> </div> $15-3=$ 12	$18-3=15$ $8-2=6$	Robert has 5 more cherries than John. John has 11 cherries. How many does Robert have? Write a number sentence you would use to solve the problem. <div style="display: flex; align-items: center; margin-top: 10px;"> <div style="border: 1px solid black; width: 30px; height: 30px; margin-right: 10px;"></div> <div style="border: 1px solid black; width: 30px; height: 30px; margin-right: 10px;"></div> <div style="border: 1px solid black; width: 30px; height: 30px; margin-right: 10px;"></div> <div style="margin-right: 10px;">=</div> <div style="border: 1px solid black; width: 30px; height: 30px;"></div> </div>	Together Sam and Tom have 19 football stickers. Tom has 8 stickers. How many stickers does Sam have? Write a number sentence you could use to solve the problem.

<p>Add and subtract one-digit and two-digit numbers to 20, including zero.</p>	<p>Make the larger number in your subtraction. Move the beads along your bead string as you count backwards in ones. $13 - 4$</p>  <p>Use counters and move them away from the group as you take them away counting backwards as you go.</p> 	<p>Count back on a number line or number track.</p>  <p>Start at the bigger number and count back the smaller number showing the jumps on the number line.</p>	<p>Put 13 in your head, count back 4. What number are you at? Use your fingers to help.</p>	 													
<p>Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$.</p>	<p>Make the larger number in your subtraction. Move the beads along your bead string as you count backwards in ones. $13 - 4$</p>  <p>Use counters and move them away from the group as you take them away counting backwards as you go.</p>	<p>Count back on a number line or number track.</p>  <p>Start at the bigger number and count back the smaller number showing the jumps on the number line.</p>	<p>Difference between 13 and 8 $13 - 8 = \underline{\quad}$ $8 + \underline{\quad} = 13$</p> 	<p>Complete:</p> <table border="0"> <tr> <td>$3 + \square = 10$</td> <td>$10 - \square = 3$</td> </tr> <tr> <td>$\square + 5 = 10$</td> <td>$10 - 5 = \square$</td> </tr> <tr> <td>$\square + \square = 10$</td> <td>$10 - \square = \square$</td> </tr> </table> <table border="0"> <tr> <td>$13 + \square = 20$</td> <td>$20 - \square = 13$</td> </tr> <tr> <td>$15 + \square = 20$</td> <td>$20 - \square = 15$</td> </tr> <tr> <td>$16 + \square = 20$</td> <td>$20 - \square = 16$</td> </tr> </table> <p>What do you notice?</p>	$3 + \square = 10$	$10 - \square = 3$	$\square + 5 = 10$	$10 - 5 = \square$	$\square + \square = 10$	$10 - \square = \square$	$13 + \square = 20$	$20 - \square = 13$	$15 + \square = 20$	$20 - \square = 15$	$16 + \square = 20$	$20 - \square = 16$	<p>I'm thinking of a number. I've subtracted 5 and the answer is 7. What number was I thinking of? Explain how you know.</p>
$3 + \square = 10$	$10 - \square = 3$																
$\square + 5 = 10$	$10 - 5 = \square$																
$\square + \square = 10$	$10 - \square = \square$																
$13 + \square = 20$	$20 - \square = 13$																
$15 + \square = 20$	$20 - \square = 15$																
$16 + \square = 20$	$20 - \square = 16$																

																														
Year 2	Solve problems with addition and subtraction using concrete objects and pictorial representations, including those involving numbers, quantities and measures.	<p>Jim has 7 cubes. Amy has 3 cubes. How many cubes do they have altogether?</p> 	<p>Complete the missing number.</p> 	<p>Lily has 3 dogs.</p>  <p>Dog A and B weigh 7kg. Dog B and C weigh 8kg. Dog A and C weigh 11kg. What does each dog weigh?</p>	<p>What do you notice about each set of calculations? What's the same and what's different about the three sets of calculations?</p> <table border="1" data-bbox="1469 504 1787 707"> <tr> <td>10 - 9 =</td> <td>20 - 19 =</td> <td>100 - 90 =</td> </tr> <tr> <td>10 - 8 =</td> <td>20 - 18 =</td> <td>100 - 80 =</td> </tr> <tr> <td>10 - 7 =</td> <td>20 - 17 =</td> <td>100 - 70 =</td> </tr> <tr> <td>10 - 6 =</td> <td>20 - 16 =</td> <td>100 - 60 =</td> </tr> <tr> <td>10 - 5 =</td> <td>20 - 15 =</td> <td>100 - 50 =</td> </tr> <tr> <td>10 - 4 =</td> <td>20 - 14 =</td> <td>100 - 40 =</td> </tr> <tr> <td>10 - 3 =</td> <td>20 - 13 =</td> <td>100 - 30 =</td> </tr> <tr> <td>10 - 2 =</td> <td>20 - 12 =</td> <td>100 - 20 =</td> </tr> </table>	10 - 9 =	20 - 19 =	100 - 90 =	10 - 8 =	20 - 18 =	100 - 80 =	10 - 7 =	20 - 17 =	100 - 70 =	10 - 6 =	20 - 16 =	100 - 60 =	10 - 5 =	20 - 15 =	100 - 50 =	10 - 4 =	20 - 14 =	100 - 40 =	10 - 3 =	20 - 13 =	100 - 30 =	10 - 2 =	20 - 12 =	100 - 20 =	<p>Insert numbers to make these number sentences correct.</p> <p>$13 - \square < 6$</p> <p>$13 - \square < 6$ $13 - \square < 6$ $13 - \square < 6$</p> <p>$13 - \square < 6$ $13 - \square < 6$ $13 - \square < 6$</p>
10 - 9 =	20 - 19 =	100 - 90 =																												
10 - 8 =	20 - 18 =	100 - 80 =

	353	354																										
2000																												
493		754																										
5000																												
Year 5	Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)				<p>Set out and solve these calculations using a column method.</p> $3254 + \boxed{} = 7999$ $2431 = \boxed{} - 3456$ $6373 - \boxed{} = 3581$ $6719 = \boxed{} - 4562$	<p>True or False?</p> <p>3999 – 2999 = 4000 – 3000 3999 – 2999 = 3000 – 2000 2741 – 1263 = 2742 – 1264 2741 + 1263 = 2742 + 1264 2741 – 1263 = 2731 – 1253 2741 – 1263 = 2742 – 1252</p> <p>Explain your reasoning. Using this number statement, 5222 – 3111 = 5223 – 3112 write three more pairs of equivalent calculations. (Pupils should not calculate the answer to these questions but should look at the</p>																						

						structure and relationships between the numbers.)
	Add and subtract numbers mentally with increasingly large numbers.				Children follow a series of instructions to find a mystery number. Eg Start with 100 Add 5,000 Take away 400 Add 20 Subtract 750 What number have you got?	
	Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.		$122 + \square + 57 = 327$	Beth and Mabel share £410 between them. Beth received £100 more than Mabel. How much did Mabel receive?	The table shows the cost of train tickets from different cities. What is the total cost for a return journey to York for one adult and two children? How much more does it cost for two adults to make a single journey to Hull than to Leeds?	Sam and Tom have £67·80 between them. If Sam has £6·20 more than Tom, how much does Tom have?
Year 6	Perform mental calculations, including with mixed operations and large numbers.				Calculate $36 \cdot 2 + 19 \cdot 8$ with a formal written column method with a mental method, explaining your reasoning.	Jasmine and Kamal have been asked to work out $5748 + 893$ and $5748 - 893$. Jasmine says, '893 is 7 less than 900, and 900 is 100 less than 1000, so I can work out the addition by adding on 1000 and then taking away 100 and then

		York	Hull	Leeds
Adult	Single	£13·50	£16·60	£11·00
	Return	£24·50	£30·00	£20·00
Child	Single	£9·75	£11·00	£8·00
	Return	£15·00	£18·50	£13·50

						<p>taking away 7.’ What answer does Jasmine get, and is she correct? Kamal says, ‘893 is 7 less than 900, and 900 is 100 less than 1000, so I can work out the subtraction by taking away 1000 and then taking away 100 and then taking away 7.’ What answer does Kamal get, and is he correct? If you disagree with either Jasmine or Kamal, can you correct their reasoning?</p>
	<p>Use their knowledge of the order of operations to carry out calculations involving the four operations.</p>				<p>Compare $31 + 9 \times 7$ and $(31 + 9) \times 7$ What’s the same? What’s different?</p>	<p>Write different number sentences using the digits 2, 3, 5 and 8 before the equals sign, using:</p> <ul style="list-style-type: none"> • one operation • two operations but no brackets • two operations and brackets. <p>Can you write a number sentence using the digits 2, 3, 5 and 8 before the equals sign, which has the same answer as another number sentence using the digits 2, 3, 5 and 8 but which is a different sentence?</p>
	<p>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.</p>				<p>Two numbers have a difference of 2·38 . The smaller number is 3·12 . What is the bigger number? Two numbers have a difference of 2·3 . They are both less than 10. What could the numbers</p>	<p>Two numbers have a difference of 2·38 . What could the numbers be if:</p> <ul style="list-style-type: none"> • the two numbers add up to 6? • one of the numbers is three times as big as the other number? <p>Two numbers have a difference of 2·3 . To the nearest 10, they are both 10.</p>

					be?	What could the numbers be?
--	--	--	--	--	-----	----------------------------

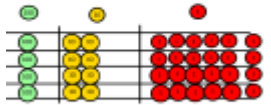

Multiplication						
		Concrete	Pictorial	Abstract	Mastery	Greater Depth
EYFS	Solve problems, including doubling, halving and sharing.	 <p>put two wheels on one side of his lorry. Now double it. He put two on the other side. That's four.</p>	<p>Jean-Luca 6/3/14</p> <p>"If you roll a 3 and a 3 you get a double and you can roll the dice again when playing a game."</p>	<p>Kaci chose to buy 2 Lego bricks at 3p each. She used her fingers to add 3+3 and said "that's six."</p>	<p>He is at the writing table with his peers. They are talking about their hands. 'I have 10 fingers look.' He holds up his hands. 'What's 10 and 10?...' I think it's 20.' He tells his peer. 'And 3 and 3 is 6.'</p>	   <p>Use different objects to add equal groups.</p>
Year One	Count in multiples of twos, fives and tens	  <p>Count in multiples supported by concrete objects in equal groups.</p>	  <p>Use a number line or pictures to continue support in counting in multiples.</p>	<p>Count in multiples of a number aloud. Write sequences with multiples of numbers. 2, 4, 6, 8, 10 5, 10, 15, 20, 25, 30</p>	<p>Show pupils pictures or groups of objects. Ask questions such as 'How many biscuits are there altogether?'</p> <p>Observe how pupils count the objects. Do they count in twos, fives etc. or do they count in ones?</p> 	<p>If I start on 0 and count on in fives will I say the number 55? If I start on 4 and count on in twos will I say the number 17? If I start at 10 and count on in tens will I say 100?</p>
	Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.	   <p>Use different objects to add equal groups.</p>	<p>★★★ ★★★ ★★★</p> <p>2 add 2 add 2 equals 6</p>  <p>5+5+5=15</p>	<p>Write addition sentences to describe objects and pictures.</p> 	<p>Ali buys 3 bags of apples. Each bag has 4 apples in it.</p> <p>How many apples does he buy?</p>	<p>Lollies cost 5p each. A pack of 3 lollies costs 13p.</p> <p>How much money do you save when you buy a pack of 3 lollies instead of 3 single lollies?</p>
Year Two	Recall and use multiplication	Look at Numicon up to 10	A flower has 5 petals. How many petals do 5	Circle the odd numbers.	Complete and compare the 5 and 10 times tables.	True or false? $5 \times 4 = 4 \times 5$

<p>and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers</p>	 <p>Which numbers are odd? Which are even? What's the same about the even numbers? What's the same about the odd numbers?</p>	<p>flowers have?</p> 	<p>12 13 17 18 21</p>	<p>What do you notice? $5 \times 1 = 10 \times 1 =$ $5 \times 2 = 10 \times 2 =$ $5 \times 3 = 10 \times 3 =$ $5 \times 4 = 10 \times 4 =$</p>	<p>$5 \times 4 = 10 \times 2$ $5 \times 4 = 2 \times 10$ Explain your reasoning. What do you notice?</p>
<p>Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals ($=$) signs.</p>	<p>$5 \times 3 =$</p> 	<p>$5 \times 3 =$</p> 	<p>$5 \times 3 =$</p>	<p>What is 5×4? What is 10×6?</p> <p>(Being able to answer such questions is, of course, important, but check pupils understand the meaning of them. For example, ask them to make 5×4 and 10×6 using concrete apparatus.)</p>	<p>Write these addition sentences as multiplication sentences. $10 + 10 + 10 + 5 + 5 =$ $2 + 2 + 2 + 4 =$ $2 + 2 + 4 + 4 =$ $5 + 5 + 5 + 2 + 3 =$</p>
<p>Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot.</p>		<p>Draw arrays</p>  <p>$2 \times 4 = 8$</p>	<p>Use an array to write multiplication sentences.</p>  <p>$5 + 5 + 5 = 15$ $3 + 3 + 3 + 3 + 3 = 15$ $5 \times 3 = 15$ $3 \times 5 = 15$</p>	<p>Show me... ... how you can represent 10×4 in as many ways as possible</p> <p>Convince me... ... that multiplication is commutative</p> <p>What's the same? What's different? $5 \text{ 10ps, } 10 \text{ 5ps, } 10 \times 5, 5 \times 10,$ $5 \text{ lots of } 10, 10 \text{ lots of } 5$</p> <p>Always, sometimes, never</p>	<p>Find different ways to find the answer to 12×4.</p> 

			 $4 \times 2 = 8$... you get the same answer whichever way round you multiply	
	Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.	 $5 \times 3 =$	Use the pictures to fill in the missing numbers.  <input type="text"/> groups of <input type="text"/> = <input type="text"/>	$10 \times 2 =$	Here are some apples.  Class 2 are asked work out the total. Here are four different ways they do it. Fill in the missing blanks. + = 10 + + + + = 10 \times = 10 \times = 10	Which has the most biscuits: 4 packets of biscuits with 5 in each packet, or 3 packets of biscuits with 10 in each packet? Explain your reasoning.
Year Three	Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	How many altogether? 	Complete the bar models.   	Show me 8 groups of 4. Tell me what division and multiplication facts you can find from this.	What is 3×4 ? What is 13×4 ? (Asking 'How did you get that?' can help you decide whether children are working efficiently with questions like 13×4 by, for example, calculating 10×4 and adding 3×4 , and that 3×4 is not obtained by counting in 1s.)	Make up a problem for 13×4 and solve it.
	Write and calculate mathematical statements for multiplication and division using the	Use Base 10 to move towards a more compact method. $13 \times 4 =$		$13 \times 8 =$	What is the relationship between these calculations? $3 \times 4 \quad 4 \times 8$ $4 \times 3 \quad 8 \times 4$	What is the relationship between these calculations? $2 \times 3 \quad 4 \times 3$ $2 \times 30 \quad 4 \times 30$ $20 \times 3 \quad 40 \times 3$ $20 \times 3 \times 10 \quad 40 \times 3 \times 10$

	multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods.					(Children should use their knowledge of place value to mentally calculate by multiples of 10.)										
	Solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects.			<p>Kainat is making buns. For every 40g of flour she needs 1 egg.</p> <p>If she uses 5 eggs, how many grams of flour does she use?</p> <p>If she uses 400g of flour, how many eggs does she need?</p>	<p>Complete the following:</p> $3 \times \square = 12$ $4 \times \square = 20$ $\square \times 3 = 15$ $8 \times \square = 24$	<p>Putting the digits 1, 2 and 3 in the empty boxes, how many different calculations can you make</p> $\square \square \times \square = ?$ <p>Which one gives the largest answer? Which one gives the smallest answer?</p>										
Year Four	Count in multiples of 6, 7, 9, 25 and 1000.		<table border="1" data-bbox="808 1098 1095 1126"> <tr> <td>14</td> <td></td> <td>28</td> <td>35</td> <td></td> </tr> </table> <table border="1" data-bbox="808 1155 1095 1184"> <tr> <td>100</td> <td></td> <td></td> <td>175</td> <td>200</td> </tr> </table>	14		28	35		100			175	200	<p>Find the next two numbers</p> <p>6, 12, 18, 24, 7, 14, 21, 28, 35, 9, 18, 27, 36 25, 50, 75, 5000, 6000, 7000</p>	<p>Gemma counts on in 25s from 50.</p> <p>Circle the numbers that she will say:</p> <p>990 550 125 755 150</p>	<p>Here is a sequence of numbers: 20, 30, 40, 50</p> <p>What will the nineteenth number in the sequence be? What will the hundredth number in the sequence be?</p>
14		28	35													
100			175	200												

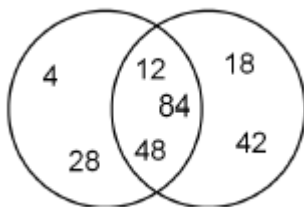

<p>Recall multiplication and division facts for multiplication tables up to 12 x 12.</p>			<p>Complete these calculations: $7 \times 8 =$ $7 \times 4 \times 2 =$ $5 \times 6 =$ $5 \times 3 \times 2 =$ $12 \times 4 =$ $12 \times 2 \times 2 =$</p>	<p>What do you notice about the following calculations? Can you use one calculation to work out the answer to other calculations? $2 \times 3 =$ $6 \times 7 =$ $9 \times 8 =$ $2 \times 30 =$ $6 \times 70 =$ $9 \times 80 =$ $2 \times 300 =$ $6 \times 700 =$ $9 \times 800 =$ $20 \times 3 =$ $60 \times 7 =$ $90 \times 8 =$ $200 \times 3 =$ $600 \times 7 =$ $900 \times 8 =$ =</p>	<p>Multiply a number by itself and then make one factor one more and the other one less. What happens to the product? E.g. $4 \times 4 = 16$ $6 \times 6 = 36$ $5 \times 3 = 15$ $7 \times 5 = 35$ What do you notice? Will this always happen?</p>												
<p>Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers.</p>	<p>Building arrays using place value counters</p> 	<p>Generalising the array using a grid (a)</p> <table border="1" data-bbox="786 596 931 679"> <tr> <td></td> <td>20</td> <td>3</td> </tr> <tr> <td>3</td> <td>60</td> <td>9</td> </tr> </table>		20	3	3	60	9	<p>Fill in the missing numbers:</p> $\square \times 1 = 13$ $12 \times 0 = \square$ $3 \times 2 \times \square = 18$	<p>Always, sometimes, never</p> <p>An even number that is divisible by 3 is also divisible by 6.</p>	<p>Try to reach the target number below by multiplying three of the numbers together. Cross out any numbers you don't use.</p> <p>Target number: 144</p> <table border="1" data-bbox="1827 719 2089 770"> <tr> <td>1</td> <td>5</td> <td>3</td> <td>0</td> <td>6</td> <td>8</td> </tr> </table>	1	5	3	0	6	8

Explain how you know.</p> $80 \times \underline{\hspace{2cm}} = 560000$ <p>What other facts do you know from this?</p>	<ul style="list-style-type: none"> Can you complete the following calculation to create 1432? $\square \square \square \times \square = 1432$ <p>What is the closest answer you can make? How do you know it is the closest?</p>																																																	

				$ \begin{array}{r} 231 \\ 1342 \\ \times 18 \\ \hline 13420 \\ 10736 \\ \hline 24156 \\ 1 \end{array} $		
	Perform mental calculations, including with mixed operations and large numbers.			<p>Work out the missing numbers</p> $5,419 + 2,000 = 9,836 - \square$ $200 \times \square = 750 + \square$	<p>The following problem was given to class.</p> $\square + 50 = \square - 25$ <p>Shellie says</p> <div style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center;"> <p>Whatever digits we put in those boxes they will always be positive numbers</p> </div> <p>Do you agree? Explain your reason.</p>	<p>Peter paid £21 for 5 presents.</p> <p>For A and B he paid a total of £6.</p> <p>For B and C he paid a total of £10.</p> <p>For C and D he paid a total of £7.</p> <p>For D and E he paid a total of £9.</p> <p>How much did Peter pay for each present?</p> 
	Identify common factors, common multiples and prime numbers				<p>Stefi says</p> <div style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center;"> <p>The only prime number between 30 and 40 is 37</p> </div>	<p>Tahil has £32</p> <p>He shares the money evenly between his friends.</p> <p>He has more than 1 friend.</p> <p>How many friends could Tahil have?</p>

Division		Concrete	Pictorial	Abstract	Mastery	Greater Depth
EYFS	Solve problems, including doubling, halving and sharing.			<p>A story made up as he works on the computer.</p> <p>This is Thomas and his friends. They are going to the shops. They are going to buy chocolate. They are going to share the chocolate. There are 5 pieces, it is an odd number so they can't share it equally so they will cut one piece in half.</p>	<p>A story made up as he works on the computer.</p> <p>This is Thomas and his friends. They are going to the shops. They are going to buy chocolate. They are going to share the chocolate. There are 5 pieces, it is an odd number so they can't share it equally so they will cut one piece in half.</p>	 <p>I have 10 cubes, can you share them equally in 2 groups?</p>
Year One	Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.	 <p>I have 10 cubes, can you share them equally in 2 groups?</p>	<p>Children use pictures or shapes to share quantities.</p>  $8 \div 2 = 4$	<p>Share 9 buns between three people.</p> $9 \div 3 = 3$	<p>Sarah is filling party bags with sweets. She has 20 sweets altogether and decides to put 5 in every bag.</p> <p>How many bags can she fill?</p>	<p>How else could 20 sweets be put into bags so that every bag had the same number of sweets?</p> <p>How many bags would be packed each time?</p>
Year Two	Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals ($=$)	<p>I have 10 cubes, can you share them equally in 2 groups?</p> 	<p>Use a number line to show jumps in groups. The number of jumps equals the number of groups.</p>  <p>Think of the bar as a whole. Split it into the number of groups you are dividing by and work out</p>	$28 \div 7 = 4$ <p>Divide 28 into 7 groups. How many are in each group?</p>	<p>Two friends share 12 sweets equally between them. How many do they each get?</p> <p>Write this as a division number sentence. Make up two more sharing stories like this one.</p>	<p>Together Rosie and Jim have £12. Rosie has twice as much as Jim. How much does Jim have?</p>  <p>(The bar model can be helpful in</p>

signs.	<p>Divide quantities into equal groups.</p> 	<p>how many would be within each group.</p> 				solving these types of problems.)
Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot.				<p>Here are some number cards. Use them to fill in each number sentence below.</p> 	<p>Circle the incorrect number sentence. Explain your reasons.</p> <p>$4 \times 5 = 20$ $5 \times 4 = 20$ $20 \div 5 = 4$ $5 \div 20 = 4$</p>	
Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in	<p>I have 10 cubes, can you share them equally in 2 groups?</p>   <p>Divide quantities into</p>	<p>Use a number line to show jumps in groups. The number of jumps equals the number of groups.</p>  <p>Think of the bar as a whole. Split it into the number of groups you are dividing by and work out how many would be within each group.</p>	<p>$33 \div 3 =$</p>	<p>Cassie has 4 bags with 5 sweets in each. Rachel has 5 bags with 4 sweets in each. How many do they have each? Can you split the sweets into different numbers of bags so they both still have the same number?</p>	<p>Two friends want to buy some marbles and then share them out equally between them.</p> <p>They could buy a bag of 13 marbles, a bag of 14 marbles or a bag of 19 marbles.</p> <p>What size bag should they buy so that they can share them equally?</p>	

	contexts.	<p>equal groups.</p> 				<p>What other numbers of marbles could be shared equally?</p> <p>Explain your reasoning.</p>
Year Three	<p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods.</p>	<p>Tens Units</p> <p>3 2</p>  <p>Use place value counters to divide using the bus stop method alongside</p> <p>Calculations 42 ÷ 3</p> <p>42 ÷ 3 =</p> <p>Start with the biggest place value, we are sharing 40 into three groups. We can put 1 ten in each group and we have 1 ten left over.</p> <p>We exchange this ten for ten ones and then share the ones equally among the groups.</p> <p>We look how much in 1 group so the answer is 14.</p>	<p>(Students can continue to use drawn diagrams with dots or circles to help them divide numbers into equal groups. Encourage them to move towards counting in multiples to divide more efficiently.)</p>	<p>Begin with divisions that divide equally with no remainder.</p> $\begin{array}{r} 218 \\ 4 \overline{) 872} \\ \underline{8} \\ 7 \\ \underline{6} \\ 12 \\ \underline{12} \\ 0 \end{array}$ <p>Move onto divisions with a remainder.</p> $\begin{array}{r} 86 \text{ r } 2 \\ 5 \overline{) 432} \\ \underline{40} \\ 32 \\ \underline{30} \\ 2 \end{array}$ <p>Finally move into decimal places to divide the total accurately.</p> $\begin{array}{r} 14.6 \\ 35 \overline{) 511.0} \\ \underline{35} \\ 16 \\ \underline{14} \\ 21 \\ \underline{21} \\ 0 \end{array}$	<p>The following problems can be solved by using the calculation $8 \div 2$. True or false?</p> <p>There are 2 bags of bread rolls that have 8 rolls in each bag. How many rolls are there altogether?</p> <p>A boat holds 2 people. How many boats are needed for 8 people?</p> <p>I have 8 pencils and give 2 pencils to each person. How many people receive pencils?</p> <p>I have 8 pencils and give 2 away. How many do I have left?</p>	<p>Sam is planting onions in the vegetable plot in his garden.</p> <p>He arranges the onions into rows of 4 and has two left over.</p> <p>He then arranges them into rows of 3 and has none left over.</p> <p>How many onions might he have had?</p> <p>Explain your reasoning.</p>
	Solve problems, including missing number problems, involving			<p>12 buns are shared between 3 boys. 16 buns are shared between 4 girls. Who gets more buns, boys or girls?</p>	<p>Use the numbers 1 - 8 to fill the circles below:</p>	

	<p>multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects.</p>			<p>Explain your answer.</p>	<p> $?\div?=?$ $-\underline{\quad}\quad\times\underline{\quad}$ $?+?=?$ </p>	
Year Four	<p>Recall multiplication and division facts for multiplication tables up to 12×12.</p>			<p>Fill in the gaps:</p> <p> $4\times \underline{\quad}=12$ $8\times \underline{\quad}=64$ $32=4\times \underline{\quad}$ $6=24\div \underline{\quad}$ </p>	<p>Leila has 6 bags with 5 apples in each.</p> <p>How many apples does she have altogether?</p> <p>How many multiplication and division sentences can you write that have the number 72 in them?</p>	<p>I am thinking of 2 secret numbers where the sum of the numbers is 16 and the product is 48. What are my secret numbers? Can you make up 2 secret numbers and tell somebody what the sum and product are?</p>
	<p>Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers.</p>			<p>Fill in the missing numbers:</p> <p> $\square\times 1=13$ $12\times 0=\square$ $3\times 2\times \square=18$ </p>	<p>Always, sometimes, never</p> <p>An even number that is divisible by 3 is also divisible by 6.</p> <p>Harvey has written a number sentence.</p> <p>$13\times 0=0$</p> <p>He says</p> <p>I can change one number in my number sentence to make a brand new multiplication.</p>	<p>Use the numbers 1-8 to fill the circles.</p> <p> $?+?=?$ $-\underline{\quad}\quad\times\underline{\quad}$ $?+?=?$ </p>

Year Five	Multiply and divide numbers mentally drawing upon known facts.				<p>To multiply a number by 25 you multiply by 100 and then divide by 4.</p> <p>Use this strategy to solve.</p> 84×25 28×25 5.6×25	<p>Here is part of a multiplication grid.</p> <table border="1" data-bbox="1870 135 2105 359"> <thead> <tr> <th>\times</th> <th>4</th> <th>5</th> <th>6</th> <th>7</th> <th>8</th> <th>9</th> </tr> </thead> <tbody> <tr> <th>4</th> <td></td> <td>20</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>5</th> <td>20</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>6</th> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>7</th> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>8</th> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>9</th> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table> <p>Shade in any other squares that have the same answer as the shaded square.</p>	\times	4	5	6	7	8	9	4		20					5	20						6							7							8							9

	Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context.			<p>$68 \div 4 =$ $1248 \div 3 =$</p> $\begin{array}{r} 218 \\ 4 \overline{) 872} \\ \underline{8} \\ 7 \\ \underline{7} \\ 2 \\ \underline{2} \\ 0 \end{array}$	<p>What number goes in the box?</p> $323 \times \square 1 = 13243$ <p>Prove it.</p> <p>Correct the errors in the calculation below. Explain the error. $266 \div 5 = 73.1$</p> $\begin{array}{r} 73 \text{ r } 1 \\ 5 \overline{) 266} \\ \underline{10} \\ 16 \\ \underline{15} \\ 16 \\ \underline{15} \\ 1 \end{array}$	<p>The answer to the division has no remainders. Find the missing numbers.</p> $\begin{array}{r} 8 \square 2 \\ 7 \overline{) 589 \square} \end{array}$ <p>I am thinking of a number. When it is divided by 9, the remainder is 3. When it is divided by 2, the remainder is 1. When it is divided by 5, the remainder is 4. What is my number?</p>																																																	
	Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000.			<p>Solve:</p> $345 \times 10 =$ $345 \times 100 =$	<p>$6 \times 7 = 42$</p> <p>How can you use this fact to solve following calculations?</p> $4,200 \div 70 =$ $0.6 \times 0.7 =$	<p>David has £35,700 in his bank. He divides the amount by 100 and takes the money out of the bank. Using the money he has taken out he spends £268 on furniture for his new house. How much money does David have left from the money he took out? Show your working.</p>																																																	

Year Six	Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context.			$1,455 \div 14$ $1,910 \div 18$ $725 \div 12$ $\begin{array}{r} 0318 \text{ r}5 \\ 20 \overline{) 6365} \\ \underline{-60} \\ 36 \\ \underline{-20} \\ 165 \\ \underline{-160} \\ 5 \end{array}$	<p>Harry says</p> <div style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center;"> <p>Without doing a written method, I know $7,350 \div 7$ will not have a remainder</p> </div> <p>Is he correct? Convince me.</p>	<p>Using the number 4,236 how many numbers up to 20 does it divide by without a remainder? Is there a pattern?</p>
	Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context			$\begin{array}{r} 041 \text{ r}3 \\ 4 \overline{) 1659} \\ \underline{4} \\ 218 \\ \underline{21} \\ 8 \\ \underline{8} \\ 0 \\ 3 \end{array}$	<p>Here is a calculation</p> $186 \div 4 =$ <p>Adnan thinks that the answer is 46r2</p> <p>Chad thinks that the answer is 46.2</p> <p>Are they both correct? Explain your answer.</p>	<p>To divide a number by 18 you can use the following rule:</p> <div style="border: 1px solid black; border-radius: 15px; padding: 5px; text-align: center;"> <p>Divide the number by 3 then divide that answer by 6</p> </div> <p>Try it for $387 \div 18$</p> <p>Can you create any similar rules for other numbers?</p>

<p>Perform mental calculations, including with mixed operations and large numbers.</p>			<p>Here is part of a multiplication grid.</p> <table border="1" data-bbox="801 137 1077 392"> <thead> <tr> <th>×</th> <th>4</th> <th>5</th> <th>6</th> <th>7</th> <th>8</th> <th>9</th> </tr> </thead> <tbody> <tr> <th>4</th> <td></td> <td>20</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>5</th> <td>20</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>6</th> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>7</th> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>8</th> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <th>9</th> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table> <p>Shade in any square that has the same answer as the shaded square.</p>	×	4	5	6	7	8	9	4		20					5	20						6							7							8							9							<p>$5,419 + 2,000 = 9,836 - \square$</p> <p>$200 \times \square = 750 + \square$</p>	<p>The following problem was given to the class.</p> <p>$\square + 50 = \square - 25$</p> <p>Shellie says</p> <div style="border: 1px solid black; border-radius: 15px; padding: 5px; width: fit-content; margin: 10px auto;"> <p>Whatever digits we put in those boxes they will always be positive numbers</p> </div> <p>Do you agree? Explain your reason.</p>	<p>Peter paid £21 for 5 presents. For A and B he paid a total of £6. For B and C he paid a total of £10. For C and D he paid a total of £7. For D and E he paid a total of £9.
