

KS1 Thinking like a Scientist

Animals including humans—Life Cycles

Key Knowledge:

Learning Questions

How does the human life cycle change from birth to old age?

How do humans change as they grow and develop?

Why do offspring resemble their parents?

How does a chicken change throughout its life cycle?

How does a butterfly change through metamorphosis?

How do animal life cycles compare?

Vocabulary

life cycle	a diagram showing the changes in the life of a living thing
foetus	a baby growing inside its mother's womb
womb	area of the mother's body where the foetus grows
offspring	the child, or young, of an animal or plant
reproduction	the process of producing offspring
transformation	a change in appearance or form
metamorphosis	the processes of insects, and some animals, developing into adult forms through a cycle of change
froglet	a young frog that has recently changed from being a tadpole
